

## Outback Awning

The Outback Awning is an ideal take anywhere economical awning. The arms/legs and front profile stay joined together and roll up along with the top quality canvas roof into the vinyl bag. The roof brace also stores in the bag, just prior to zipping closed.

The awning is quickly and easily erected by hand rolling out the canvas and folding out the legs and arms which are permanently fixed into the front profile. Legs are fixed to the ground with pegs to stabilise for windy conditions. The addition of the roof brace supplied eliminates wind flap.

Walls can be added with the addition of zips fitted to the roof fabric.
